

Homeschool Admission

THE
KING'S
UNIVERSITY

We'll work with you

We are happy to work with students who have received home-based education to ensure they meet the requirements to come to King's.

Standard or Non-Standard Curriculum

Homeschooled applicants typically fall into one of two categories: those who have completed a standard curriculum, and students who have completed a non-standard curriculum.

Homeschooled applicants who have completed a *standardized curriculum* will be assessed similarly to non-homeschool students from that region. Applicants who have completed a *non-standardized curriculum* will need to provide additional documentation to show they meet King's admission requirements. All students must show documentation confirming they've completed all the required grade 12 courses.
